To Whom It May Concern:

Reference: Breninger Communication.

In 2002, Enviro-Clear required a replacement for its obsolete telephone system. *After much research and analysis, we selected Breninger Communications based upon the confidence Russell Breninger inspired.*

That confidence was not misplaced. For over 4 years. The system recommended and installed by Breninger Communications has met all of our expectations. Even more important the support provided by Breninger Communications has exceeded our expectations.

When our requirements and technologies' advances dictate it is time for a new communications system, Breninger Communication will be our vendor of choice.

Very Truly Yours,

Cindy Meyer
Vice President
