Russell Brenninger
Brenninger Communications
807 Schenck Drive
Flemmington, N.J. 08822

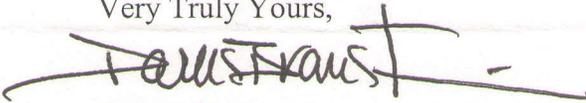

To Whom It May Concern:

In August of 1999, our company constructed a new 40,000 square foot retail facility in Edison, New Jersey. We contracted with Brenninger Communications to install the wiring for our 60 user computer network. The job required wiring throughout several offices, POS workstations, as well as sales workstations across a 30,000 square foot warehouse floor. Despite the size and complexity of the job, Russell and his associates were in and out in a reasonable amount of time, and did an absolutely professional job.

Since then, we have used them for various other projects, and as always, we are extremely satisfied with their work.

I certainly will continue to use Brenninger Communications for our wiring and communication needs in the future, and highly recommend them to anyone considering their services.

Very Truly Yours,

Darren Braunstein
Vice President
