Advanced Telephones That Mean Business

24 Button Keypad

The 24 button speakerphone is the ultimate telephone for maximum call management effectiveness. Phone system activity is easily monitored at a glance, especially important for companies where phones mean everything. Its easy-to-read display speeds access and enhances the integration of our advanced traffic flow and call routing technologies. Samsung's 24 button keypad is the premier telephone, designed to bring new levels of efficiency and versatility to your workplace.

Softkeys

Interactive Softkeys give you easy access to the most common features, putting the full intelligence of the system right at your fingertips.

Speakerphone

Crystal-clear speakerphone quality allows complete hands free calling, so users can both talk and work with ease.

Programmable Keys

Fully programmable keys let you configure the system the way you want, providing maximum efficiency.

Easy Access Buttons

For effortless, mistake-free dialing.

Daughter Board

Completely independent separate station access means the daughter board can double the capacity of your station ports.

Samsung Phones Fit Your Every Need

Our telephones are designed from top-to-bottom for advanced functionality and ease-of-use. Cutting-edge design and powerful features combine to make day-to-day functions even more versatile, so your business can communicate and work with maximum efficiency.

12 Button Keypad

The 12 button speakerphone is ideal for the rapidly growing company whose business is telephone intense. Offering the same advanced features as the 24 button keypad, it is recommended for users who don't yet need all the capabilities the 24 button model offers (also available in non-display model).

7 Button Keypad

The 7 button keypad is reduced in size, not power. It is frequently the most cost-effective solution for companies that don't need sophisticated optional features, but still want the confidence of knowing they can handle high volume traffic with smooth efficiency.

Add-On Module

Samsung's console offers 64 additional fully programmable buttons, providing any keypad with unbelievable versatility. You can add up to two 64 button consoles or four 32 button add on modules (AOM's), for supreme call coverage control. Use AOM as a stand-alone intercom unit, room monitor, or for executive Off Hook Voice Announce (OHVA) features.

Computer Telephony Module

Now you can use Computer Telephony Integration (CTI) – the most sought-after enhancement in the telecommunications industry – to easily interface with your personal computer. By combining the intelligence of your computer with the advanced features of our telephones, you can multiply your communications power many times over.
